## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 9-14 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 9-14 are drawn to functional descriptive material embodied on a computer readable medium (i.e., "data structures and computer programs which impart functionally when employed as a computer component" at MPEP 2106.IV.B(1)). However, the program/algorithm itself merely manipulates data or an abstract idea, or merely solves a mathematical problem without a limitation to a practical application in the technological arts. MPEP.IV.B2(a) (statutory Product Claims) states:

"A claim limited to a... manufacture, which has a practical application in the technological arts, is statutory."

In order for a claimed invention to accomplish a practical application, it must produce a "useful, concrete and tangible result", *State Street*, 149 F.3d at 1373, 47 USPQ2d at 1601-02 (see MPEP 2106.II.A). Currently, the claims do not recite a

practical application. In order for the claimed product to produce a 'useful, concrete and tangible" result, recitation of one or more of the following element is suggested:

- The manipulation of data hat represents a physical object or activity transformed from outside the computer (MPEP 2106.IV.B2(b)(i)).
- A physical transformations outside the computer, for example in the form of pre or post computer processing activity (MPEP 2106.IV.B2(b)(i)).
- A direct recitation of a practical application in the technological arts (MPEP 2106.IV.B2(b)(ii)).

***Allowable Subject Matter***

4. Claims 1-8 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter:

Regarding independent claim 1, the prior art, taken either singly or in combination, does not teach:

- performing JPEG processing, using the JPEG engine, on an uncompressed digital image of a scene, producing JPEG data in which the discrete cosine transform coefficients are encoded in a byte-aligned manner.

Regarding claims 2-5, since these claims depend from claim 1, they are also allowable for the same reason.

Regarding independent claim 6, the prior art, taken either singly or in

combination, does not teach:

- configure the JPEG engine to produce a data stream in which discrete cosine transform coefficients are encoded in a byte-aligned manner.

Regarding claim 7, since the claim depends from claim 6, it is also allowable for the same reason.

Regarding independent claim 8, the prior art, taken either singly or in combination, does not teach:

- means for configuring the JPEG processing means to produce a JPEG compliant data stream in which all discrete cosine transform coefficients are encoded in a byte-aligned manner.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
